---

**OBJECTIVE:** Innovative and results-driven Computer Science student with a strong foundation in software development and machine learning. Passionate about solving real-world problems, optimizing performance, and building scalable applications.

---

## EDUCATION

### B.E in Computer Science Engineering

Chandigarh University, Mohali | **2022 - 2026 (Expected)**

**XII** – Ranbir High Secondary School, J&K | **79%** | **2022**

**X** – Ranbir High Secondary School, J&K | **93%** | **2020**

---

## PROGRAMMING LANGUAGES

- Python, Java, C++
  - Frontend Technologies: Basic HTML and CSS
  - Database Management Systems: MySQL, MongoDB
- 

## PROJECTS

### Language Exchange Community

- Developed a **real-time multilingual chat platform** using **React, Node.js**.
- Integrated **secure authentication with JWT** and **MongoDB-based user profiles**.

### Biometric Attendance System

- Designed an **AI-powered attendance tracker** using **Python, Flask, and Face Recognition**.
- Automated **real-time attendance logging** with **SQLite storage and Excel reporting**.
- Built an **interactive web dashboard** for seamless **user and data management**.

### Sewage Monitoring System

- Developed an **IoT-based system** for **real-time monitoring** of sewage levels to prevent overflow and environmental hazards.
- Utilized sensors and **microcontroller** integration with live dashboard updates.

### Patient Registration System (Python)

- Created a GUI-based application in **Python** for efficient patient data entry and storage.
  - Integrated form validations and data persistence using file handling or a **lightweight database**.
- 

## SOFT SKILLS

- Analytical Thinking
  - Problem Solving & Decision Making
  - Leadership
  - Adaptability & Continuous Learning
- 

## HOBBIES

- Music
- Gaming
- Movies
